01 PROFILE

Apprentice Data Engineer at Moët Hennessy and freelance web developer at BressoDup. I build reliable data pipelines and fast websites with the same discipline: measure, deliver, document.

02 EXPERIENCE

APPRENTICE DATA ENGINEER SEPT. 2026 — NOW
MOËT HENNESSY · MARNE

- Industrialising data pipelines in Python and SQL, so they run on their own, without surprises.
- Making BigQuery models on Google Cloud reliable: checks, tests, numbers that tell the truth.
- Documenting every delivery so someone else can pick it up tomorrow.

FOUNDER · FRONT-END, HOSTING & SEO 2025 — NOW
BRESSODUP · MARNE & ARDENNES

- Websites for small businesses, craftspeople and local councils, with Arthur, before setting up a company together.
- The whole journey in hand: Figma mock-up, React and TypeScript development, hosting and DNS.
- A Lighthouse score of at least 90 written in black and white in every contract.

03 EDUCATION

BACHELOR IN COMPUTER SCIENCE (BUT) 2024 — 2027
IUT DE REIMS-CHÂLONS-CHARLEVILLE · URCA · REIMS

- Three years between theory and projects: algorithms, databases, full-stack web, project management.
- Team projects: CoLive with five people in Symfony, Mazes in Python, the game library in PHP.

CLASS REPRESENTATIVE

BACCALAURÉAT, WITH HONOURS 2024
LYCÉE SAINT-PAUL · CHARLEVILLE-MÉZIÈRES

- Mathematics: the logic and rigour I use in data today.
- Computer science (NSI): first Python programs, first data structures.
